CAREER OBJECTIVE

Final-year Cybersecurity (Computer Science) student at MITS with strong programming foundations in Java, SQL, and full-stack web development (React, Node.js, MongoDB), and hands-on experience in Web Application Security, VAPT, SOC operations, and Digital Forensics. Seeking a Programmer Analyst, Application Security, or SOC Analyst role to apply strong problem-solving, coding, and database skills alongside practical security expertise to build and protect software systems.

EDUCATION

Bachelor of Technology in Cyber Security, MITS *Expected 2027*

CGPA: 9.32

TECHNICAL SKILLS

Programming : DSA with Java, JavaScript, SQL, HTML, CSS, Tailwind CSS

Frameworks / Databases : React.js, Node.js, Express.js, MongoDB, PostgreSQL, Bootstrap, Grafana Dashboards

Cybersecurity : VAPT, SOC, Web Application Security, Digital Forensics, Cloud Security, AI Security, Firewall Administration, EDR

Security Tools : CrowdStrike Falcon EDR, Fortinet Fortigate, Wazuh SIEM, Spharaka Networks, Burpsuite, Splunk, Metasploit, Nmap, Nuclei, Nessus, Wireshark, SQLMap, Httpx, RustScan, IDS/IPS (Snort, Suricata), pfSense, Autopsy, FTK, Postman

Cloud Security: AWS IAM, AWS Security Groups/VPC, S3 bucket policies, CloudTrail, CloudWatch, Compliance frameworks

Operating Systems : Windows, Linux (Kali Linux)

Version Control / Tools : Git/GitHub, Vercel, Render, Netlify, VS Code

PROFESSIONAL EXPERIENCE

Blue Cloud Softech Solutions Ltd. (CyberSecurity Intern) *On-site*

- Built an AI-powered SOC Copilot using the MERN stack, implementing threat correlation, threat intelligence, risk scoring, REST APIs, and performing OWASP-based VAPT on web applications.
- Developed Grafana SOC dashboards and deployed Wazuh agents for log monitoring and threat detection, while earning Fortinet NSE 1–3 and CrowdStrike certifications in cybersecurity.

Supraja Technologies (Advanced CyberSecurity Intern) *Remote*

- Developed a USB Physical Security detection system (capstone project) that monitors device events, verifies OTP-based authentication, captures intruder snapshots on failed OTP attempts, flags unauthorized access, and helps prevent data exfiltration.
- Performed network scanning, enumeration, and vulnerability assessment using Nmap, Metasploit, and Wireshark; conducted security monitoring and log analysis using Splunk.

Saredufy Web Plus Academy Pvt Ltd. (Course Coordinator & Developer) *Remote*

- Developed and maintained web-based applications, implementing features, debugging issues, and resolving technical problems to improve project functionality.
- Mentored and managed student project teams through the CC panel, reviewing code, tracking project progress, and providing technical guidance to ensure timely project completion.

PROJECTS

- **Agentic- SOC:** Built a 4-node automated SOC that centralized security monitoring, reduced false positives, enriched threats, and automated alerting, reporting, and incident summaries.
- **CyberSight ASM**: Built an Attack Surface Management platform to automate external asset discovery, service fingerprinting, vulnerability identification, technology detection, and security reporting. (Github)
- **DNS Tunneling Detection**: Built a rule-based system to detect DNS tunneling and data exfiltration using PCAP analysis, behavioral features, and explainable risk scoring. (Github)
- **Hungry Beast Restaurant Web**: Built an online food ordering platform allowing users to browse menus, place orders, and directly communicate with restaurant owners for a seamless dining experience. (Live Link)

CERTIFICATIONS

- Crowdstrike Falcon Administrator
- Certified Full Stack Developer, Data Structures and Algorithms (DSA) — Saredufy Web Plus Academy Pvt Ltd.
- Netsec Professional Certificate – Palo Alto Networks
- Java (Basic) Certificate — HackerRank
- SQL (Basic) Certificate — HackerRank
- Fortinet NSE 1, NSE 2 & NSE 3
- Cisco Networking Academy — Junior Cybersecurity Analyst & Network Defense
- Supraja Technologies — Cybersecurity Excellence (Levels 1–6)
